

Event Day Report

Client: Demo data - privacy protected · Event day walkthrough

Visit Date: 28 September 2026, 2:00 PM – 3:30 PM

Generated by: AI report assistant, from a Preserver field export

Summary

An event day walkthrough was carried out on-site, covering a venue set-up and styling check, a run-sheet and timeline review, and a catering and supplier check. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

The venue set-up and styling were checked and confirmed ready, the run-sheet and timeline were reviewed and confirmed on track, and the catering and supplier deliveries were checked and confirmed ready for guest arrival.

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the event day, turned into a guest-ready walkthrough the same afternoon it was captured.
