

Service of Process Report

Client: Demo data - privacy protected · Civil service of process

Visit Date: 28 September 2026, 3:10 PM – 4:00 PM

Generated by: AI report assistant, from a Preserver field export

Summary

A service of process was carried out at the nominated address, covering a document verification check, an attempted service at the residence, and a proof of service sign-off. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Documents were verified against the case file and confirmed correct, service was completed at the residence as instructed, and the proof of service was signed off and ready for filing with the court.

Service Summary

Category	Observation	Status	Action Required

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the service, turned into a court-ready proof of service the same day it was captured.
