

Crop Health Advisory Report

Client: Demo data - privacy protected · Paddock advisory visit

Visit Date: 28 September 2026, 7:00 AM – 8:10 AM

Generated by: AI report assistant, from a Preserver field export

Summary

A crop health advisory visit was carried out across the paddock, covering a crop condition and leaf inspection, a soil sample collection, and an irrigation system check. All observations were captured on-site using the Preserver app, with GPS location and timestamp data recorded automatically alongside supporting photos and voice notes converted to text.

Crop growth was even with healthy leaf colour across the inspected rows, soil samples were collected for nutrient testing at the scheduled point, and the irrigation pivot was confirmed operating correctly with even coverage.

Advisory Summary

Category	Observation	Status	Action Required
Crop Condition	Even growth, healthy leaf colour	On Track	None
Soil Sampling	Samples collected at scheduled point	Complete	Send to lab for nutrient analysis
Irrigation System	Pivot operating correctly, even coverage	On Track	None

Field Evidence

The following images and captions were captured directly through the Preserver app during the visit. Each entry retains its original GPS coordinates and capture timestamp. Demo data - privacy protected.

Crop rows — leaf and growth inspection

-28.1234, 151.4567 · 28 Sep 2026, 7:10 AM

Crop leaves and growth inspected across the paddock, healthy colour and even development observed.

Soil sample — nutrient testing

-28.1238, 151.4571 · 28 Sep 2026, 7:38 AM

Soil sample collected with a probe at the scheduled testing point for nutrient analysis.

Irrigation pivot — system check

-28.1242, 151.4575 · 28 Sep 2026, 8:00 AM

Irrigation pivot sprinkler system checked, confirmed operating correctly with even coverage across the crop rows.

Voice & Text Observations

Observations below were recorded on-site as voice notes and automatically transcribed, or entered directly as text, through the Preserver app.

Time	Type	Transcript / Note
7:10 AM	Voice	"Crop's looking even across these rows this morning, good leaf colour, nothing to flag."
7:38 AM	Voice	"Collected the soil sample at the usual point, sending this off for the nutrient panel."
8:00 AM	Text	Irrigation pivot checked, operating correctly with even coverage across the paddock.

Site Visit Log

7:00 AM	Activity started on-site — GPS lock confirmed, paddock location
7:10 AM	Crop condition inspection — photo + voice observation logged
7:38 AM	Soil sample collection — photo + voice observation logged
8:00 AM	Irrigation system check — photo + text observation logged
8:10 AM	Activity ended and locked — record sealed, tamper-evident

How This Report Was Produced

This report was generated from a single Preserver export — no re-typing, no separate note-taking app, and no manual GPS lookups. During the visit, every photo, voice note and text entry was captured in one place, each automatically stamped with the time and exact location it was recorded.

At the end of the visit, the activity was locked directly in the app, sealing the record so nothing could be altered after the fact. The full activity — photos, transcripts, GPS log and metadata — was then exported in one step (JSON + Photos) and handed to an AI assistant, which produced the structured report above in a matter of minutes.

The result: a defensible, timestamped, location-verified record of the visit, turned into a grower-ready report the same day it was captured.

Preserver

Free to capture. Record your observations — photo, video, voice or text — with GPS and timestamp on every entry. Export anywhere, including straight to AI. preserver.me
